## About Us

Sneha Software is Information Technology firm that provides technical solutions and outsourcing services to local and international customers since 2007. Sneha Software Solutions owned and led by Raj Kumar Pal, has development facility of more than 1800 square feet at Hyderabad, India.

Since 2011, we have been servicing startups. We are a company of diverse, talented people with a passion for pursuing excellence in all that we do. Since inception, we have successfully executed couple of projects for local and international clients on .Net and PHP technology. Each of these projects brought different challenges, new leanings and constant changes to Sneha Software which made us customer centric, flexible and yet process oriented unit. We focus on "customer delight through quality in services" by attaining highest quality in service delivery there by attaining excellence in productivity by implementing the tools and techniques of total quality management.

We create value for our clients by providing a comprehensive set of services and solutions that focus on building truly secure, scalable, reliable business systems and enterprise solutions that are architected for the competitive future.

Our Re-usable frameworks, Domain knowledge along with our teams of skilled and experienced professionals and centers of excellence enable us to deliver quality outputs regardless of scope virtually anywhere in the world.

## IT Services

If you are looking for good quality service and on-time delivery without burning a hole in your pocket, you do not need to go any further.

IT service management (ITSM) is the process of aligning enterprise IT services with business and a primary focus on the delivery of best services to end user.

IT service management deals with how IT resources and business practices in together, are delivered in such a way that the end-user experience the most desired result from the accessed IT resource, application, business process or an entire solution stack.

ITSM audits are based on analysis of four key performance indicators in specific ways:

 Growth and value, which involves tracking revenue growth against investment and utilization

 Budget adherence, which involves optimizing the use of available funds and avoiding unnecessary expenditures.

 Risk impact, which involves identifying and evaluating the consequences of risks taken or avoided.

 Communication effectiveness, which involves examining customer feedback and gauging customer satisfaction and awareness.

## Web Services

Web services are typically function calls made over a network using Web technology to transmit the information. Often the information that is transmitted is formatted as XML.

A web service can be contrasted with a typical web request even though they both use web technology. A typical request is started by a human who uses a web browser and the result is HTML that is displayed in the browser. In a web service the request is started from a program and the result comes back to the program.

In some cases the program is running in a browser, and it will modify the HTML that the browser is displaying. This is a common usage for AJAX applications.

**Web Design Services** It is always very important to have stunning and outstanding site whether you are interested in modern design or classic style. Beautiful and eye-catching sites always attract more users no matter whether it is simple or complicated, extremely advanced. Expert Web Works Custom Website Design Company always knows what to suggest to its distinguished customer, how to project the customer's thoughts illustrating the essence of site itself. The company helps to create the site which will be pleasant, original and engaging look.

We are sure that you will be the happiest person cooperating with us and we will never make you upset. You will get a lot of positive emotions and excitement. We are in the field of web design services for a long time and we well understand needs of our clients. We have catered to wide base of clients all over the world. We

## E-publishing

We offer various E-Publishing services that encompass migration of content from almost any format to digital format. Our publishing team is equipped to deliver all types of services and solutions for the print, online and media do mains with its two major wings– pre-press and e-publishing.

Our team has expertise in almost all formats and tools that are in use in E-Publishing media today. The raw for mats we can work on are MS Word (RTF), Quark, Text, PDF, Page Maker, image Files TIFF, image PDF, JPEG etc.) As well as hard copies. To achieve this, we make use of in house developed tools as well as commercial applications.

E-Pub file extension is for Open eBook (or OEB) which is the e-book for mat based on XML format and defined by Open Publication Structure (OPS) specification. As the trend of reading e-Books is gaining popularity, E-Pub format is also becoming the fast preferred industry standard world-wide. More and more publishers and authors are now developing their books in E- Pub eBook for mat along with the Kindle, Mobipocket and Microsoft reader. The E-Pub reader files can be read on wide range of electro nic book reader s with the help of Adobe Digital Editions, FBReader, Lexcycle Stanza, Mobipocket Reader, Open berg Lector and others.

EPub conversion is the best option as these providers have mastered the skill of conversion. The submitted file can be of any format like Word, Indexing, Printed books, PDF, etc. Whatever it can be, a scanned copy or eBook; an Epub Company can publish any type of work within the TAT with complete job satisfaction.

Remember all Epub documents need a master's hand to deliver the best result. It is not sufficient to put text, graphs, images, tables and charts in right Order but e-publisher must have expertise in computing and thorough knowledge and understanding of digital publishing. E-Publishers must have good knowledge of com-
